---

Professional Profile

Freelance developer and computer science student building web applications and process automations, from database design to user interfaces. My experience as a professional footballer taught me teamwork and discipline under pressure. I am seeking an internship or junior developer role.

Experience

Freelance Web Developer · Jan 2026 - Present

Build web solutions from requirements to deployment, including responsive interfaces, API integrations, and automation with Python, Supabase, and AI.

Freelance Graphic and Web Designer · Jan 2025 - Present

Design visual identities, interface prototypes, and digital assets with a focus on usability.

Projects

Download Studio · Python, PySide6, watchdog

A Windows application that monitors the Downloads folder, validates files, and sorts them into configurable categories.

Order and Inventory Automation · Python, Supabase, AI

A system used by a food business to automate incoming orders and track inventory.

Online Store for a Clothing Brand · JavaScript, HTML/CSS, PostgreSQL

An e-commerce project in development with an online storefront, relational database, and catalog management.

Education

Bachelor's Degree in Computer Science · Jan 2026 - Jul 2029 (expected)

Universidade Veiga de Almeida (UVA), Rio de Janeiro. Completed first year at Afya, Porto Velho (2025).

Software Development Bootcamps

Digital Innovation One (DIO) · AI, data security, and coding practices.

Technical Skills

Python, JavaScript, C, C++, HTML5, CSS3, React, Node.js, PostgreSQL, Supabase, Git, GitHub, and API integration.
